LICENSING & REVIEW

Pursuant to 35 U.S.C. 184, the subject matter of this application may be filed in a foreign country for the purpose of filing a patent application without a license any time after the expiration of 6 months from filing date unless the application becomes the subject of a secrecy order.

10. (14.00) Indicate a pattern and duration of symptoms in the patient's medical history that would delay the initiation of treatment with a first-line antitubercular regimen and would justify treatment with a second-line regimen only from the time compared to the primary rule application with duration 90 days or more, from the time compared to the primary rule duration 90 days or more for which "Drug Resistance" (bacterial culture, histology, or microscopy) is indicated in the ICD-10, and/or the presence of a second-line drug, rifampin or isoniazid, in the patient's history.
